

EUROPROFILES

The European association of
Bead and Lath producers

EAE Forum
Milan
12 october 2015

Introduction :

Founded in 2003 in Germany

13 members from 5 markets, employing over 1000 people

Covering over 80 % market needs

Supported by the national and international partners

Partner in the standards committees

Mission :

Europrofiles aims to support :

1. The right use and application of the products
2. Increase the performance of the plastering process
3. Develop the quality levels in building and construction

The strategy

1. A communication process of technical documentation
2. Creation and distribution of guidelines and specifications for the designer and the contractor
3. Participation at national and European standard committees
4. Development of cooperations with professional organisations of contractors and mortar producers
5. Development of quality levels of the products
6. Information and training to the different professional distribution channels
